

What Litter-Robot Customers Are Saying

Review of the Litter-Robot by Franny Syufy on About.com - Guide to Cats:

".... this small machine performs a heavy-duty job, with a minimum amount of human involvement. I give it five stars, my highest rating, and do not hesitate to recommend it to cat wranglers who hate litter box chores."

[Read the entire review on About.com](#)

The litter-robot saves me money, time, and low back pain!

Now when I travel for a week, I have the pet sitter come only once to change the litter-robot liner and make sure the food and water dispensers are filled and clean. Cha-Ching!

I just purchased my second Litter-Robot, and couldn't be happier!

My husband and I bought a vacation home, and I decided to go "budget" on the litter box there. It lasted about 3 weeks, and I realized I wouldn't survive without a Litter-Robot.

That litter robot sure wasn't cheap, but wow.

I've bought a lot of junk in an attempt to save time, but this is the first which has literally changed our lives. Seriously, the ability to clean up after an old cat with only a 7 minute wait is simply wonderful.

We have had the Litter Robot for two weeks now and are very pleased with it.

More important, our two cats are pleased with it - especially our one very fussy princess.

I have been looking to buy the Litter Robot for well over a year, I was worried my son's two cats might be too large for it.

Now my Son will have less work, and the Boys will have a clean litter box, These are my Grandcat's after all. Shipping was super fast, and customer service was awesome.

I absolutely love your product.

I've had it for 2.5 years, and it's absolutely great. I use the crystals because I can't stand the tracking mess clumping litter causes, but still no odor, no mess.

This is the best invention in cat maintenance in the world.

We bought 3 of these units about 4-5 weeks ago, 2 for my daughter and one for us; we have 3 cats each...If we do finally become 100% Robot dependant this will be one of the greatest things in 37 years of married life.

I have nothing but wonderful things to say about this product.

I'm amazed at the level of refinement, the ease of use and the usefulness of The Litter Robot. A great company and a great product. In this day and age, you stand out for all the right reasons.

I am happy to say we LOVE our Litter Robot.

I just wish we knew more cat owners to pass the good news onto, if we do, we will definitely recommend your fantastic product. Thanks for all the trouble free years

of cat waste management!!

We bought our Litter Robot several years ago and are now looking into a second

Our three cats use it regularly and the easy of maintenance has been wonderful. No more daily scooping, no more overpowering odors, best thing since clumping cat litter.

I have 2 chubby cats who are insanely picky about their litter box.

Well, right after I put the robot together one cat sniffed around then immediately jumped in. About 3 minutes passed and the other cat came in the room and saw it. She jumped in as well! They both walked away like nothing was new! No more smelly box or worse! Dirty cat paws walking around!

We finally found the Litter-Robot and took the chance.

We could not be happier. We have now had the Litter-Robot for 5 year as of Thanksgiving and it's still chugging along. We will not hesitate to buy a new one when this one finally gives up.

I bought my Litter-Robot almost 1 year ago, and I LOVE, LOVE, LOVE IT.

There is NO smell, and there's virtually no mess at all. My 2 cats took to it immediately, although I did have to run it manually the first few days as the motor scared my older cat at first.

Keep up the great work.Appreciate your customer service.

Just wanted you to know that we had our litter robot since 2006 and it is still working till now. Our 2 Siamese cats love it more than anything and I tell you they are huge cats.

This machine is worth every penny!

I've had it a few months now and already it's worth every penny. Not only do I no longer have to deal with scooping litter every day, which is a beautiful thing, but their customer service is magnificent!

I am amazed at the difference in no odor, less litter usage and such a easy cleanup everyday.

I now have 5 cats now and have never been happier! I still use one plain pan for our old girl who refuses to use it, but placed them side by side. Now.. one question.. WHEN are you going to make one for dogs?

I, too, was daunted by the high price tag. But you know what? I figured with a 60 day guarantee, I couldn't go wrong.

How right I was! My cat began using the litter robot on day 1 and I have never had any problems.

So I searched to find the "perfect" one and I ordered the Litter Robot to try it.

I have absolutely found the best automatic litter box ever! It works great.

It's amazing to think how much noise, mess, and waste I was used to putting up with from the littermaid.

I had no idea that anything on the market would work this well. All in all, I couldn't be happier with the litter robot.

It is magical.

Everything people say is true--lack of smell, ease of cleaning, reliability, much

less cost for cat litter. It does pay for itself.

Thanks for your great service and a SUPER product.

Tell the folks this is not an oversell. This machine REALLY WORKS. HONEST. Both you and your cats will be happy. Cats love a clean potty room.

I would like to share what a wonderful invention this is!

It should seem like a silly extravagance, but for a working, traveling couple...it really isn't. There are so many positives to owning this machine, from the lack of smell in my house, to using less litter than ever before, from the sheer automation of a necessary, but yucky task!

I just wanted to say how much I LOVE this product.

Who knew you could feel so passionate about a litter box??? The \$300 investment has paid for itself ten times over.

Thank you for a GREAT product...

the Litter Robot more than meets my expectations, and my cat's needs. It was the 3rd brand I researched but the only one that I seriously considered, based on the customer reviews.

I would like to thank all of your personnel for the quick repair service...

that I received from you company. Also it's really great to talk to people who a polite and really try and help with your problem. The litter robot is 1000 times better than the littermaid that it replaced.

We have had the litter robot for about 6 months and love it!

We recommend it to all our friends with cats. We used to have a Littermaid, that we have had to replace at least once a year and it was just too messy.

We really had no space for a cat litter box better yet the Litter Robot.

We have two cats in a one bedroom Manhattan apartment (the size of most Americans living rooms). We keep it in the bathtub. We have to move it in and out every day but it is so worth it. When I come home I smell NOTHING and don't have to do scoop duty. I tell all my clients it's worth EVERY penny.

I had a Litter Maid Deluxe, after spending 200 dollars on it I was pretty disappointed.

For one I always felt filthy after changing it and at 13 dollars for 12 plastic containers it got expensive fast. The Litter Robot at 300 dollars was a little more expensive but really saves money in the long run.

Research on- line brought the Litter Robot to my attention, and I instantly ordered one.

No one can smell that we have cats and I no longer have the daily unpleasantness of scooping! Plus, I confess I love a great gadget.

I first heard about the litter-robot on the Clark Howard radio show in 2000.

If Clark thought it was a good deal I had to look in to it. At the time we had 3 indoor cats. What a lifesaver it has been for us. As we have added new cats to our family over the years, we have not had one of them refuse to use it.

No more freeing jammed litter rakes or daily scooping required!

I've owned 3 litter maid automated boxes and although they work "ok", they constantly jam, break, and require daily scooping. I finally purchased a Litter

Robot after hearing many good things about the unit and I couldn't be more pleased.

We bought one of these, largely as a result of the testimonials...

It's more than lived up to our expectations. If you can afford it - get it. It's great.

I just wanted to say that this product has stood the test.

I purchased my litter-robot over 5 YEARS ago and it still works GREAT! I have tried every litter box, including other automated product but this amazing invention is by far the best.

I saw this device and was VERY skeptical,...

but the 18 month guarantee swayed me to buy it. Now I just wish I would have seen this earlier! Never will I buy a different machine again!

A reliable, low maintenance automatic self cleaning cat litter box...

It fees you from the chore of litter box scooping. Ideal for multiple cats - up to four cats per unit.

This is, without a doubt, worth every penny!

There is no smell and litter lasts much longer than with the other litter boxes. You also don't need to buy anything special for this litter box. It uses medium size garbage bags that can be purchased in any super market! It will pay for itself over and over!!

I just want to thank you for the best invention ever!

My Litter Robot II is the best purchase I have ever made.

Just a note of thanks to the folks at Litter-Robot.

I recently needed some help with our unit and the support was fantastic. It is hard to find good service in these times, but Litter-Robot and staff have surpassed my expectations.

The litter robot works nice and is the best liter box I've seen!

It is worth the cost!!

There are two products in the world that every cat needs to have, they are a Drink well fountain and a Litter Robot!

Don't waist your money on all the other litter boxes, they break down, become impossible to clean and can scare or injure your pets.

I think 5 years of perfect service is more than any customer can ask for in a mechanical product of this nature.

I was convinced that the product was perfect and could not be improved upon. But after receiving my NEW, upgraded version of the Litter Robot, I must commend your development team for the changes that have been made.

This has been the most wonderful invention ever!

My cat never had any problem getting used to it, clean up is very easy and we don't have to smell a stinky litter box.

I just threw away its predecessor which was driving us all mad.

I have just installed the Litter-Robot and it so efficient. My 4 cats took to it right away with no problems. I am very pleased at its performance.

What a joy to have in the house!

No longer is there a cat odor. LOVE IT, just love it.

It took her about fifteen minutes to decide she trusted it...

and an hour to use it. The first time it activated, she watched it nervously and jumped whenever it moved. The next time, she walked up, stepped on the step, and when it next moved she ran backwards about three feet. By the end of the first day, she was going over and stepping on it a few times every so often to make it do the funny thing again.

After much research of automatic litter boxes, I decided on the Litter Robot.

Glad I did. I have a 16 year old, very finicky cat and she is doing just fine. She didn't take to it right away, but with some work after a week or so, she started using it.

Total costs for one month? \$7.09 + electricity...

and the cost of the LRll (which really pays for it self in 3 months if your time is worth anything). We figure it saves us 10 minutes a day and no back pain from bending over 4-5 times a day.

Honestly, I initially hid the cost from my husband.

Once he realized what a godsend it was, he had no complaints! My sister lives in my in-law apartment downstairs. She has a Litter Maid system, but even her cats

sneak upstairs to use my Litter Robot!

We now show & tell to all our friends...

who have or are thinking of adopting a cat about this amazing product. So far, everyone who has purchased one, shares with us how much they love their Litter-Robot.

Wish I had bought this appliance in the first place.

My previous automatic box lasted about two years before quitting. I decided to give Litter Robot a try and am not the least bit sorry.

I am very happy with the litter robot.

When you consider how much time you save by not having to scoop out clumps every day and constantly change litter, the price seems almost minimal. It also makes your cats happy too. There is an added bonus of coming into the house after a long day and not be greeted by the smell of the litter box.

Just wanted to let you know that our Litter Robot is still running strong.

I believe it is 4 years old and used by two indoor only cats. We love the product and thought you might like to know they certainly last a long time.

The litter robot keeps the smell down in the house and is easy to clean up.

One cat even insists on sleeping in one!!! I have three so far and also three old littermaids. I plan to replace the littermaids with the litter robot as soon as possible.

Your mystery box arrived last Thursday to gales of sniffing...

inspection, and general distance by my four boys (ages 12-17). Then we went through the bored period. I went into high gear with a large pair of nose and ear plugs.

In deciding to get them, I vowed to get an automatic cat box.

We had a wonderful cat for 19 years, who in his later years proceeded to wet everywhere! Neither my husband nor I wanted to clean that box and in the interim I had multiple back surgeries which led to him doing it! Not a good thing... I told him about some automatic cat boxes and he agreed, stipulating it was my responsibility this time!

I would not have believed that you could make the Litter Robot even better...

but the new seal and filter are fantastic. If we didn't have a Litter Robot, we wouldn't have cats -- plain and simple.

I love that machine. It is my favorite cat item.

Visitors never even know I have two cats until one of them jumps on a their lap. Your cat box is amazing. All my friends that have seen mine buy one.

My litter robots are wonderful!

I have two of them and they are the best invention since sliced bread! To those who read this, this is not a scam...you will love them, really! They are so worth the money!

We have had our Litter Robot II for nearly six months now, and it's paid off!

Still functions perfectly, our cats still love it, it's easy to use, and we've saved lots of money on litter and receptacles. I'd recommend this product to anyone who has

a cat, and I can testify it works just as well with multiple cats.

Soon he started using the LR and I would cycle it when he wasn't around.

Then he started using the LR exclusively and would even sit and watch it cycle after he was done. Now, a year later all is well and he uses it all the time. I only have to change the trash bag once a week, even longer if I have to.

I tried tidy cat, fresh step and cat attract...

and the cat still would not use the litter box. I was about to give up when I went to kroger and bought the cedar fresh with cat attract in it made by ultra-pet. So I took it home and put it in the litter box and to my surprise- the cat used the box.

This is where I should have spend my time and money in the first place...

(actually, no time was involved in making this switch). The trial period was a big selling point for me so I took the leap. What did I have to lose? I am so glad a trial period was offered or I would have never spend that kind of money on a litter box and my home would still smell like a litter box.

I have to admit it was a little pricey for a pooper scooper...

but after watching several videos of it doing its thing online and reading a boatload of positive customer reviews I was sold especially with the 60 day money back guarantee and the 18 month warranty I figured to let the cats give it a try. .All in all were pretty impressed with it so far -money well spent!!!

...even more thrilled with your customer service.

We had a problem 3 days ago and I called and left a message. I really never expected a call back so quickly and was even more delighted that the person on the phone knew exactly what to do and even more, guessed the cause of the problem. Our parts arrived today and in 5 minutes were were up and running

again.

We tried two other brands in the past, and they were always jamming up...

and you had to clean the rakes which would break the clumps apart. Robo does it perfect. I haven't even cleaned the top section since we received it. but I don't feel bad because it is not dirty in any way.

What a wonderful invention.

I have two Litter Robots and now I have just ordered my third unit after rescuing another cat. This is the most amazing litter box ever ...!

I am soooooooooo happy with the litter robot.

I can't believe how well it works. It took our cats and kitten less then a week to get everyone to use it. I have one cat (which was a ferial) that loves to stand on the step and watch it go around.

I went behind her back, like any caring husband would and placed the order...

When I brought it home, my wife was upset; until, that is, when I set it up. Our cats took to it immediately, which was a relief, and we put it to work right away. One year later, our litter-robot is still working hard doing the dirty work and my wife could not be happier.

You guys should develop one of those 'priceless' commercials.

Cat adoption fee \$100.00
Cat litter \$11.99
Cat food \$ 9.99
Litter Robot...never having to scoop poop again: PRICELESS !

I loved it immediately, but one of my two cats refused to take to it.

In the end, I outsmarted my cat by bringing back her old litter box...Now both of my cats use it and I am really happy.

Well, the Litter Robot is just the best!!!

I was hesitant because of the price, but it is well worth every penny. In fact, I think it will save me a lot of money because you use a lot less litter.... For anyone with a multi-cat household, this Litter Robot is a must.

This litter box is one of the best investments in pet products we have made.

With four large cats we were scooping our old box every day, now it is simply changing a bag every other day. After a short adjustment period, where they learned it wasn't the new place to hang out, it's been fantastic.

We just get to enjoy the love they give us and we are lucky enough to give back!

What an invention! My white kitty, Gibbs, is already large so he trips the switch easily but little Cash is so tiny he does not.. No problem..I just hit the button for him and it is clean!!! I told my husband last night that it was like not having kitties at all....no more messy clean up or smell!

The staff was helpful and very knowledgeable when I talked with them on phone and e-mail...

I want to mention that I did have trouble with my Bot 1 twice. I returned the unit and got quick service and repair. These folks do seem to really want to build the best product possible.

Let's be honest - scooping litter boxes is truly the worst chore!

Thank you automated pet care products for such a great invention - finally! No

more doing "paper-rock-scissors" to decide who's going to clean out the litter box!
Ha!

I have three cats, and two loved it from the get go and one just refused...

Now she uses it all the time, I think it just stressed her out as she hates changes. But now she is the one who sits there and watches it cycle when she is done her deposit. Be patient with your kitties, it took mine two weeks to get it together.

I think this is a great machine.

My little one isn't always heavy enough to trip the sensor but no big deal. A tap of my foot, or if she's followed by one of her brothers, does the trick. It is very easy to maintain and the waste drawer has a large capacity so that even with the three I don't have to empty it frequently. I highly recommend this box!

I'm coming up on four months with the LR. I've already sent you letters of praise and a testimonial.

I'm sorry to do it again, but..... I'm so happy with this product. It continues to work beautifully everyday. My kitties love it, I love it, my wife loves it. What an ingenious solution to a dirty problem.

I waited a few months before submitting my testimonial to really give the Litter Robot a thorough looking over.

The product meets, and possibly exceeds, all my expectations. I have two older cats (11 and 12 years old and they have had no problems at all and seem to prefer the Litter Robot over their traditional covered box.

I cannot tell you how happy I am with my Litter Robot.

We have two cats and after a rather slow start they have taken to it so well. There is hardly any odor (the only time I have that is when the big guy doesn't turn around and his hind end hangs out, but that happens very seldom) My husband

actually thought they must be going somewhere else because he couldn't smell the box.

Yours seemed to be the most well engineered system from a functional standpoint just from the basic physics.

I was a little concerned with the price, but with the 60-day guarantee, I felt we had little to lose. We have had it for almost two weeks and I must say this is the most efficient litter system I have ever seen!

My 2 cats were inside the thing within 6 hours of setting it up...

I am sure that over time it will become even more of a godsend. My wife and I aren't fighting as much now either. My cats are tickled to death as well.

I put her into the littler robot. She used it and that was that!

My daughter has had a littler robot for six years so when I was about to adopt Mandy (who had been rescued by the son in Philadelphia), I purchased one.

I have had 3 different Litter Maids...I was so fed up with them!

Then I read a review on Amazon.com about the LitterRobot. I went to your site and read the testimonials and decided to try it since it had such a good return policy.

This cat box probably saves me more time than my dishwasher.

Setup is as easy as advertised, and the unit is very easy to keep clean. We have ten cats, and only 3 are not using the robot at this time. The house never has a cat odor any more, and we are using a fraction of the litter with a fraction of the tracking that we had in the past.

Just want to let you know, we did a complete cleaning of the LRll today.

Piece of cake!! I stuck it in the shower and rinsed with warm water. 10 minutes later I was done.

My first one came and within just several days...they were using it.

No smells and very little tracking outside of the dome. It worked so well that I have ordered a second unit for another room.....I love this...and even with multiple cats using each unit, I only need to empty the drawer about every 3 days or so....

I just have to give you my vote.

At one of my client's house I noticed the box and bought one. The amount of money and time the Litter-Robot saved me was worth the initial outlay...

All in all, I'm extremely happy with the Litter-Robot and highly recommend it.

It's on the high end, price-wise, but it's also on the high end, performance-wise, so if you can afford it, buy it! Based on our experience, you won't be disappointed.

...provided odor control and prevented the dog from "snacking"....

Unfortunately, one of the cats would not use it, so we returned it after a few weeks. They have a no questions asked return policy (less the shipping costs) so I stand by the company.

I stumbled across Litter-Robot online, but dismissed it due to the high cost...

I came back, however, and began reading reviews. After reading about the payment plan and all the great reviews, I decided to order. This product is

fabulous!!!. We have 3 cats, and my male cat used it within 20 seconds...

I think the whole system is pretty darn amazing,...

and the look of the black "Star Wars" model is very sleek. The delivery box was pretty scary ... I thought you sent a trainer along with the "bot" but, no, it just was a great packing job. The unit itself is not huge, about the size of a kitchen trash can. I've read about the noise and to that I say "what noise?", it is very quiet. I am impressed.

I previously bought 3 littermaids and they all went wrong...

due to damaged circuit boards. It was impossible to send them back to the manufacturer from the UK, so I searched the web and found the litter robot. I have had mine for six months now, and cannot praise it highly enough. The cats took to it straight away, there is absolutely no smell and it uses far less litter than the Littermaids

All I can say is WOW! The Litter Robot surpassed my every expectation.

Initially my 2 cats were very reluctant to go near the Litter Robot. Lo and behold after following the advice given in manual, within 3 days they were happily using the Litter Robot. One of the best decisions I've every made!!!

It appears to be solidly built.

I had horrible experience with another litter box cleaner. They usually broke with less than a month of use. I'm hoping Litter Robot will last much longer than that. I'll give you a feedback later this year to see how this product is holding up.

I love the Litter Robot!!!

I have arthritis, and it makes my life so much easier. My cat was nervous about it at first, so I left it off until he had used it a few times.

Our cats took to the box within a day. I didn't need to coax them at all.

It's funny to watch how each cat uses it. I guess I never realized how very particular cats can be. They are definitely clean, and they deserve the cleanest, most efficient litter machine around.

I thought maybe my cats were too big or there were too many...

...or they might not aim right once inside. But finally I broke down and bought one and we love it!! Cats do too.

After our litter robot arrived my husband eagerly set it up...

doing everything the manual said to do to introduce our kitties to it... they took to it immediately...my husband is so impressed and fascinated with this neat gadget, now HE takes care of everything!

This was the perfect solution.

This product is so easy to assemble and operate and is very well built. There was certainly a lot of thought that went into the design of this product. We love it

I did notice a little bit of curiosity on the cats part, so I started the "cycle"...

...so he could see it and hear it while I was there with him. A few hours later while the cat was sitting on my lap, I heard a strange noise and noticed that the Litter-Robot had come to life. Ahhh, the sweet sound of success.

Zen, the male cat, finds the device fascinating.

He watches the cycle with total attention. He has learned that if he puts his paws

on the sensor during the cycle it stops and if he takes them off it continues. So every once and a while we have a 5 minute cycle. It doesn't harm the machine and it makes Zen happy.

Can I be thrilled with a product only after a week of use?

I'm still so surprised that such an unusual product solves the cat litter problem so elegantly! I wish your business every success.

I wondered what I was getting into when the BIG box arrived - but assembly was a breeze and the cats were curious...

No more spraying over the edge of the box, and no smell. I love the convenience of the drawer. Why didn't I buy one of these before! It is great!

I tried others first... It was a waste of money.

I PROMISE YOU, I have had this litter box for almost 2 years now, and it is absolutely the BEST thing that will ever happen to you and your cat.

I ordered the Litter Robot before Christmas and I am very glad I did.

I was a little bit concerned about the price, but I can say it is worth every penny! I have 4 cats and my bathroom never smells anymore.

I put it together and I swear both my cats were in it within the first few seconds of the initial cycle.

I used some old litter with new but I think they were just into the privacy of the dome. Since I have been an electric litter box consumer for many years I have to say I have never been more excited by this product.

I bought the litter robot as a Christmas gift to myself and love it.

It seemed pricey so I purchased a reconditioned unit and my cat took to it as soon as I set it up. I also received the unit very quickly after ordering. This strange looking, yet wonderfully working machine makes litter clean up as effortless as possible.

I've been using the litter robot for a few years now.

The new one is MUCH improved over the earlier model. It's lighter and has a larger "waste bin". My 3 year old cat Sushi (a ragdoll) thinks the litter robot is a personal sandbox and just spends a lot of time playing in it as well as doing his business.

After having the Litter Robot for about 7 months now we love it.

Not only can it handle all 4 of our cats, but we are using so much less litter then ever before. There are 2 great things about the Litter Robot, 1) there are no special bags or containers you have to purchase and 2) It works great.

Happy days are here again. We have 3 of the six cats now using it.

Perhaps after the holidays we can get the other three such a present. No fuss, no muss, and NOTHING MISSING THE TRAY !!! This has been the best purchase since my last amateur radio antenna.

I ordered the Litter Robot after going through three messy, smelly, sticky Litter Maids.

We have had it for two weeks now, and I have to say this is worth the money! We went cold turkey, took out the Litter Maid and put in the Litter Robot, and our cats, (five of them!), went right in and have been using it ever since.

I can't speak highly enough of the Litter Robot.

We did a LOT of investigating before making this purchase and hands down, research paid off. And with such a great money back guarantee like the LR II, what's to lose? Nobody and I mean NOBODY has this kind of satisfaction guarantee...

This is, by far, the best litter box ever!

Easy set-up; Low litter usage; No smell. We'd been through two Litter-maids before giving up on them. Too many times the rakes [on the Litter-maids] had to be cleaned and the last one quit working within 2 months of purchase.

I did a manual cycle and I'm so amazed by the clever design.

If you watch it do its thing you can appreciate the genius of this product. My hat is off to the LR folks.

It is the best litter box I have found.

And if your wondering about the price don't, because the time it will save you in clean up is well worth the price. And by the time I returned all the stuff with the old litter box (bags,tent,litter, ect..) it was well over the price they want for this unit anyway.

After I began using the Litter Robot I was amazed how well it worked...

... so much so that I kept forgetting about it! For anyone who is considering purchasing any type of automatic litter box, here here are the reasons you should by the Litter Robot...

The convenience is what I was looking for.

Would I recommend Litter Robot, you bet and I have to many of my friends. The price is the only thing holding them back, but for me, it was worth every penny.

I received the Litter-Robot a month ago and so far really like it.

It did take the cats about 2 weeks to get used to it. Love the bag system and even with the 4 cats, don't have to empty it as often. The odor problem has also been eliminated.

The positive reviews on LitterRobot are all true!

This product has made things so much easier for me! One of my kitties is one of those that is picky about only going into a clean litter box.....Litter Robot is the best. It took very little time to get my kitties adjusted to it.

I love the fact that it's nice and quiet and kitty safe.

This is the most incredible machine I've ever seen for the dreaded kitty problem. Kudos to your engineer(s) who came up with this. The fact that it shuts off when pressure is put on the front step is remarkable.

I love this litter box. It did not take long to get my cats to go in it and they seem to like it a lot.

There is absolutely no mess at all! How refreshing! A litter box that works! AND I don't have to buy those expensive, polluting receptacles. I only have to change the bag once a week with two cats. Thank you for inventing a great product. I am telling all my friends with cats about this.

I purchased my Litter Robot 1 year ago and it has worked great.

I have 3 cat's that use it - though it took some getting used too. I have used Litter Maid's in the past and the last one I bought failed after a few months so I decided to try the Litter Robot.

After a few years of cleaning the cat boxes the old fashion way...

I decided to check out the new crop of automatic cat litter boxes, and after reading

several reviews, I decided that Litter-robot was the best solution for me. When I went through the reviews, and cat forums, Litter-robot had the most positive feedback, and very little drawbacks.

This is an amazing machine.

I have two cats and they took to the Litter Robot instantly. In fact, the baby (he's a year old) was so fascinated he kept going into it and triggering it. He would then sit outside it and watch it go through the cycle. It was pretty funny.

Without the Litter Robots I would be cleaning litterboxes all day.

I keep one in the laundry room, one in the living room (makes an interesting conversational piece) and I'm soon buying a 3rd...

The Litter Robot is AMAZING!

After already going through three (yes three) Litter Maids in one year I was skeptical about buying another automatic cat box. We have four indoor cats that HAVE to have a clean cat box or they will show their dissatisfaction by soiling outside of the box! Well I am happy to say that the Litter Robot has outdone itself in more ways than one...

This is above and beyond what I expected.

I purchased my Litter Robot about 3 years ago. I recently had a small mishap when I got too close to the power cord with the vacuum. It snapped it off at the transformer. I called Customer Care and had a new one sent out at no charge the next day.

Thank you Litter-Robot.

You entertain one cat and keep both our cats healthy, and you save me time cleaning up cat rowf and spot shampooing the carpet.

The cats have voted.....they prefer the new model to the old.

They use the new one 90% of the time. They go a lot so we're definitely a two robot household!

One of my two cats had no problem using it, but the other one wasn't using it.

I was devastated, but there was a very good step by step manual with the litter robot to get my cat used to it. Now both are using it with no problem. And I am only cleaning it on the weekends, and I can clean it just in 30 secs. or less, no joke I counted the time.

I looked at all of the self-cleaning litterboxes on the market and of them all, this one got the best reviews.

It took little time for my cat to acclimate to the Litter Robot. I did use the suggestions in the manual. Several cat treats later, she used it. I'm grateful it was easy to put together and the manual is really easy to follow. It's also a lot quieter than I expected - I can actually sleep through the cycling.

This is the best automatic litter box available.

I used the Litter Maid for years and had to replace it 3 times in 4 years because of problems. I've had the Litter Robot for 1-1/2 years now and it works as great as the day I received it.

My house has never smelled better and my cats would take the litter-robot over me any day.

They love the litter-robot as much as I do. 2 weeks ago it stopped working for some reason so I sent an e-mail to the customer care dept. They were so nice and helped me fix the problem. (turns out I didn't have my sensor adjusted correctly for my cats, all it took was a turn of a knob to fix). How's that for easy!

Thank you soooooooo much for such a wonderful product!

My cat got used to it pretty fast. I just used a small amount of her used litter crystals.. and she, after wondering for a while about that monster booda, went in and does so since.

I am so pleased with your product, it's money well spent...

... because you use less litter and no more replacing other automatic litter boxes which was a waste. There is nothing that can compare to your product, it's trouble free and clean!

I haven't had to use the scoop or put out a litter box for two months now.

It's so clean and nice for the cats! We give this product our highest recommendation!

We've had the Litter Robot for over a year and have absolutely no regrets.

There is not a month that goes by that I don't tell my husband that I need to write you and give you all of our thanks! The litter box is cleanest our cats have ever known, therefore the cats are happier and we are much happier with the cats!

My "boys" had absolutely no problem in adjusting to the new unit.

So far it has been flawless in operation and a pleasure to own. I wished I would have had this unit since it first came out!

I am sincerely grateful and thank you so much for this wonderful invention.

I received my Litter Robot and put it together on Sunday. Within 10 minutes of

having it together, all three of my cats enjoyed using it. This is the best purchase I have made in YEARS.

I had tried numerous litter boxes for my cats, unable to find a good one.

I tried electric litterboxes by littermaid, 3 of those broke so I returned the last of them and looked to find something else. ...I read the testimonials and saw that there are numerous people who have large cats who use the litter robot with no problem. I decided to give it a try.

Oh my goodness! Where have you been all my life!!!!!!!!!!

I LOVE the Litter-Robot! I have had a litter mate that broke down and I got a replacement and it broke down. Frustrated I started looking on-line and came across your website. I must admit I was hesitant but with 3 cats I needed some help. I have had my Litter-Robot for over a month now and it has been wonderful.

We have tried all the other automatic litter boxes with little to no success.

The rakes clog and are very difficult to clean. Several of the most "famous" auto boxes don't even work. When we saw an add for the Litter-Robot, we were skeptical. But after reading the testimonials and checking on several discussion groups, we decided to give it a try.

I Just wanted to say how much I LOVE the litter robot!!!

As soon as we set it up, our 3 cats were very curious and didn't have a problem hopping right in!!

I don't worry about cleaning the litter box anymore...

considering how tidy the cleanup has become. I buy 10-7 gallon trash bags at smart & final and I'm all set, I use a bit of scotch tape to keep the bags in place and shizam! I'm a very happy camper. I plan to buy another one just so extend the

period in which I have to clean them.

Had positive testimonials for people with 3 or more cats...

The Litter Robot was the only machine I had found online that had positive testimonials for people with 3 or more cats. I was hesitant to pay so much for an electronic litter box, but the positive reviews from people with 5, 8, and even 14 cats were pretty convincing.

Ingenious design, not hard at all to get even my "scaredy-cats" to use it.

My cats love having a clean litter box and I love it, too! It works so well that it takes the dirty work out of cleaning the litter box.

I want to thank the staff at Litter Robot.

The customer service is very helpful and the people are very accommodating to your needs. As a pet owner everybody knows our kitties are like our kids and we want the best care for them.

It was a refurbished one but you sure couldn't tell it.

Five of our six cat took to it immediately... This product is great, haven't had a bit of trouble with it and will be ordering a second one soon.

The cats love always having a clean litter box and it is so easy to keep up even with all the cats we have.

The way it takes care of odor is amazing. I am recommending it to all my friends that have cats. Don't be put off by the price it is well worth it. Thanks to the litter robot team for such a great product!

The ever so noticeable litter box smell is gone.

Our plumber came in and saw it and said he couldn't even tell we had cats because he couldn't smell anything. I give the Litter-Robot an A!!!!

This automatic litter box is the BEST.

I had other automatic litter boxes that jammed and the litter tray hard to change, but this the Cadillac of the litter boxes.

We have had our Litter-Robot for almost three years now, and it has been the best money spent.

We just use grocery bags in the receptacle and rarely buy cat litter because it uses so little. My husband loves the fact all he needs to do is pull out the bag on trash day, once a week, and replace with a new one.

I love my LR so much I put it on my blog!

http://www.geeknuz.com/nuz/2007/06/the_ultimate_ca.html

I love it! I have 3 cats- 2 of which are 18 lbs or so.

No problem getting all of them to use it after they got used to the noise.

I just received the litter robot and already love it!

I barely had it set up and my cats were already interested.

Since a purchased a litter robot, tending the cat litter has turned into a quick

and painless twice a week chore.

It's worth more to me than what I paid for it.

I have been a proud owner of the Litter Robot for a year now. It is awesome!!!!

It was worth every single penny.

Not only did our cats start using it right away, we have since realized that they actually seem to use it for entertainment. They climb in and out. They watch it go through its cycle. They are fascinated by it.

Our good friend is extremely allergic to cats, and since we've had the Litter-Robot in our house, no more wheezing, sneezing, or runny nose when he comes to visit.

He is amazed that with eight cats there is no litter box odor.

The litter robot is amazing! My cats figured out how to use it within a day and even find it entertaining.

I'm very glad I upgraded! The added rubber catches for the bags in the container really does keep everything where it belongs --- in the box.

I cannot tell you what a change has been made in my household by purchasing the Litter-Robot. The cats are happy, their momma is happy, and

it makes for a happy, sweet smelling home.

People thought I had gone mad to spend this on a litter box. But the difference was amazing.

I did research on cat boxes for 3 months before purchasing the Litter Robot. I've used it now since 10/06 (7 months) and think it is the best designed product I've seen in years.

We had tried EVERY other automatic litter box (unsuccessfully) before we found the Litter-Robot!

She quickly adapted to it and I must say that while a costly device for me, it has been money well spent.

What a clever idea! AND, best of all, it lives up to all your promises!

Well I have had the unit for over a year now and it is great. No smell, no mess and I just read the article about the new unit with a larger pan.

Hi, I just wanted to say that this product is totally amazing.

As a testament to the performance and durability of the Litter-Robot, I am

please to report my Litter-Robot is five years old and still running smoothly.

Thank you for making my house an odor-free zone!

Well had I known how improved the Litter Robot II was I may have ordered it anyway.

The materials the robot are made out of are improved, it has a higher quality feel to it. The filtering screen is much better. But the biggest improvement is the drawer; it's deeper and with the poop distribution ridge along the bottom I can go a full week between emptying it and I've got two cats! No more caked poop! Cats live for twenty years. Do yourself a favor - get a cat box that's up to the task.

This is the best litter box ever made!

I had various versions of the rake litter box models and had to constantly clean the rake, reset the motion detector and still ended up scooping litter! I was getting ready to go back to the old fashioned box when I read a review for the Litter Robot...

I talk about it all of the time and I have at least 3 people I know who are probably going to order. So thank you for a great product. I also think that your website is great.

I went through two boxes a week with the LitterMaid. With the LitterRobot, a box lasts me two full weeks!

I love this product!!!!!!!!!!!!!! It is so easy.

To Litter-Robot Team: First off, I would like to commend you on a great product and service!

All I can say is all the testimonials are right on target. Satisfied.

I have had the litter box about 3 weeks and I love it.

Both of my cats used it with no problem, I just put it down and they began using it.

I can't tell you how much my kitty loves his Litter-Robot.

He even sits and watches it as it tumbles and removes the waste. It's not only a litter box, it's a kitty TV!

Great product and very fascinating to watch!

Thanks very much for making such a great quality product!

I ordered the litter-robot and since DAY 1 I have been thrilled.

I received my Litter-Robot about 2 weeks ago. My two Himalayans adapted to it easily.

This is the most wonderful, well-worth-the-cost machine I have ever bought.

Got rid of the old box after 3 days. Best litter box ever wish I would have got one years ago.

Litter Robot is a dream come true. With 4 cats I thank God everyday for my Litter Robot.

After reading all the testimonials, I figured it was worth a try. This thing is AMAZING!!!!

Thank you! You were definitely thinking Out of the Box.

Ok! This is the litter box I should have bought three years ago. Meanwhile, I spent \$450.00 on other litter boxes first. Don't make that mistake, buy this one first.

I have never been more satisfied with any product. The Litter Robot has really saved me both time and money.

Litter-Robot: Automatic Litter Box or "Cool New Hangout"?

Thanks, guys! This just might be the best invention ever made!

Now I am thinking about buying the litter robot 2. I am very happy with this wonderful company.

The Litter-Robot is truly maintenance free! Just dump the bag every few days and put in a new one and your good to go. Best purchase I have made!

It just took a little catnip to spark their curiosity, and 5 minutes later I saw the litter making its cycle.

This is the first testimonial I have ever written, but I just had to tell you how much I love my Litter Robot! This is some of the best money I ever spent!

...I have recommended your product to all my cat people.

I've had it for almost two years now and I love it! It makes it so much easier to have cats.

The entire experience of researching the Litter Robot, completing the purchase, and delivery and set up were first class.

How wonderful to receive a product that is everything it is touted to be and deal with courteous and knowledgeable real people. I am so impressed with this product and company!

After three days, I threw away the box it came in. I knew there was no way I was ever letting anyone take my Litter Robot away. It is absolutely

wonderful!

You guys did a great job building this thing.... Somebody was thinking and created a great product.... Took my cats only two days to get use to it and no problems since....

Thank you for coming up with a litter box that is so much fun for the cats and so easy to clean for the owners.

I have owned a countless amount of automated litter boxes. I have never been as happy as this litter robot. The design of this Litter Robot is very modern and well designed and the functions are amazing!

FINALLY, someone has come up with the purr-fect litter box. Congratulations! Our two cats are delighted, and so are we!

So I do recommend the Litter Robot and I do and will suggest "odor neutralizing" bags to go with it.

I have three cats and two had developed inappropriate urine habits. They expected a clean box 24/7 and as a working girl I could not attend to the box to their expectations. After a month with the Litter Robot I must say the situation is much better.

I just wanted to let you know I have had the litter robot for over three years and it is still going strong. It is hard to imagine having a cat without one.

I was skeptical, now I'm sold. My cats went straight into it.

No adjustment period for them at all. Now we sing its praises. Literally. We've made up a little ditty about it.

It is sooo easy and has allowed me to stop worrying about getting home to clean the litter.

Great product and great customer service!!!

What a great device! Totally worth the cost.

Very satisfied after 2 years...it still works practically like new.

This product is fabulous! I have two cats, ages 10 and 14, and was a little reluctant to purchase the Litter-Robot, as they are a bit old to "learn new tricks."

However, I followed your advice and left the old litter box next to the Robot, and in two days they were both using it.

This is the best cat box ever! I have tried every type of cat box out there trying to find one that works like it's advertised

The primary reason for us ordering this was we had a problem with our dog getting into the standard type boxes.

The Litter-Robot not only solved that problem but the convenience and ease of cleaning has made a previously uninviting chore now pleasant by comparison.

People, *this* is what an automatic litterbox is supposed to be: Easy, simple, clean, and quiet.

And unlike the other automatic litterboxes, this one doesn't keep you locked in to proprietary supplies.

I only have to change out the container once a week and it is so nice to enjoy my cats without having to go through the hassles of cleaning a litter box every day.

The best part is that I am saving a lot of time and I never worry about coming home to a smelly apartment.

I just wanted you to know that I am absolutely LOVING the litter robot!!

Thanks so much for a great product that really lives up to the promises.

I LOVE THE LITTER ROBOT!!!

This device has changed my daily routine. Simplifying it and thereby changing my life.

My cats started using it quickly (one more quickly than the other, but that's cats for ya).

One cat clocks in at 25 lbs, the other is rather skittish...

I love my litter robot and thank you so much for having persons with such knowledge who answer calls when customers call with inquiries.

All of my 5 cats used it the third day and continue to do so!!

The fact that it keeps the litter from getting stagnant is an absolutely incredible innovation!

I have two of these they are the best on the market worth every penny!!!

Great product!

I recommend it to everyone.

That was a lot easier than I expected!

I decided to open the box and have a look and was encouraged to find that you just set the top on the bottom and attach the plug and it's assembled.

Cleaning the robot is so simple it is hard to believe.

Worth every penny and then some!

Received my Litter-Robot Fri.

The old litter box is on another floor of the house and there was no problem at all getting my 3 to use it.

I have had my Litter-Robot for about a year and a half now and it has withstood the test of time - still works perfectly.

Great quality product and I suggest it to all my cat-loving friends.

The design of the Litter-Robot is impressive.

I have tried all of the other types of "automatic" litter boxes, and none compares with the Litter-Robot.

I've never written a testimonial about any product that I have purchased in my life.

But in the case of the Litter-Robot I just had to let all of you cat lovers, litter box scooping haters out there know what an amazing product this is!

This ingenious device is the best thing since sliced bread.

Every time it cycles I experience an enjoyable sense of freedom - I don't have to scoop any more!!

I decided to buy it partially on the good reviews of customer service.

Those reviews were correct and I have been very satisfied with the nice and prompt response.

Our cats love it and tried to get in it while I was setting it up.

But I am even more impressed with the concept. The concept is completely "out of the box" and breaks paradigms.

I l-o-v-e it.

The cats constantly have fresh litter and I don't have to even _think_ about it for days.

The Litter-Robot is a life-saver!

Instead of scooping litter ever single day, I empty the litter tray about once a week, check on it occasionally, and that's it.

My cat loves the fact his litter is ALWAYS clean.

As far as using the product, it has been unbelievable.

Thank you, Thank you Thank you for your ingenious invention.

I have eight cats and one "guest" who has been with me for 6 months. They all took to it almost before I got it out of the box.

It is so rare in this day and age to find a company that stands behind its product, but this one does!

I and my cats have been thrilled with the Litter-Robot, and I have just purchased my second Litter-Robot.

First I had a LitterMaid.

Now I have a Litter-Robot. I love it. I love everything about it. My cat loves it.

We did the math on the Litter-Robot and found that, within a year, it

becomes cheaper than the LitterMaid by a significant amount...

...I think your device is brilliant and should be the top choice for anyone who hates dealing with the litter box, or is otherwise fed up with the high cost and questionable reliability of the LitterMaid and similar products.

Great product.

I didn't bother with a gradual change - I just took out the old litter box and set up the Litter-Robot. I have been using the Litter-Robot for over two months now without any problems whatsoever.

Litter-Robot, you are my hero!

The smell is over, the dumping of messy litter is gone, and the cleaning of a litter box is nil...

I couldn't have multiple cats without it.

All 3 cats used it immediately. It's worth every penny.

My cats are happy, I am happy.

This is the first product that has lived up to its name.

Thanks for such a good product.

I have two cats, and empty the pan about every 4-5 days.

Way to go I have recommended it to every cat lover I meet.

I was also worried because 2 of my cats are very skittish so I did not think they would go in this crazy orb like structure. Now they think it is a game to go potty and then get out and watch it clean the litter.

This machine is the crème de la crème!

When I received my Litter-Robot my life changed. I cannot understand how I have survived until now!

What fantastic results! Both cats took to it immediately.

A few weeks ago I wrote to the nice people at Litter-Robot about my two humongous cats (25# and 26#) asking if the product would work for them.

Highly recommended.

The Litter-Robot works, it's easy to clean, it's expensive, and it's worth it.

I did research online and I am so happy I chose the Litter Robot....

My 2 cats Louie & Tye love it!!! Tye was scared of it at first but I followed the tips given to me by your company and within 2 weeks he was going in it w/no problems.

I am absolutely delighted with the Litter Robot....

...as are "the babies." They never hesitated to use it, nor ever had any fear of it.

Great Product !! Saves A LOT OF LITTER....

I have tried other automatic litter boxes and NONE Work BUT THIS ONE DOES!!

We bought our first Litter Robot a couple of months ago....

...just to see if it was worth it. And how it is!! We bought a second one after a week. I have been so thrilled with mine that I just purchased one for my mother

My cat accepted this litter box right away....

For me it's great to only empty a bag once a week. This is an exceptional device and it's well worth every penny.

I've used most of the tips described on your website and in your manual to get my squeamish cats used to the LR, and they eventually worked.....

I also came up with some on my own tactics, that I thought I would share in case you wanted to tell other customers who may be having trouble getting their cats to use the LR.

I have had the Litter Robot for about 5 months now....

...and it is the best thing I have ever purchased! I have 4 cats who use it regularly and I am very happy with the way it works.

I just got my new litter box 2 weeks ago....

I put it together, put some litter in it and left it sitting, unplugged, next to the old one for one day. I was really worried because one of my cats

Customer service has been fantastic....

I bought another for my best friend, plan to buy some for my family members, and recommend it to anyone. If you consider what it does, the price is negligible! Don't waste another day cleaning a litter box!!

Just wanted to tell you how much I think of your product....

I have 17 cats and have purchased 5 litter robots thus far. They're super. I've had them up to about 4 mos, but so far have had NO problems at all.

I have to say I was very skeptical about this product....

...particularly since it was only available online and the cost was more than any other product I had researched.

After reading the numerous positive testimonials and given the 30-day return policy I decided to take a chance and ordered one.

I received the Litter-Robot to day and had it set up in no time....

This is a GEM. My 14 year old cat went in after she investigated it for a few minutes. I had the Litter Maid, and your unit is far superior. What a wonderful product for me and for my Pumpkin. Thanks again for this Wonderful Machine.

We have four felines and had four stinky litter boxes....

No matter how much we scooped and cleaned, they just were awful! Not to mention we had our Sunday night ritual of "catbox cleaning" (EWWW!) I was seriously considering trying to find some neighborhood kid who would be willing to do it for a few bucks!

Of all the companies that I have worked with on-line, you are absolutely the

most user-friendly customer-service oriented....

And on top of that, your product is wonderful. It is everything that it is advertised to be. I don't understand why every person who has a house cat does not have a litter-robot.

So far my 1 litter robot has outlasted 2 other brands of automated catboxes....

I am ordering a second one for our 8 indoor cats. Best box on the market.

I have now had my "space-ship" for about a year and a half....

I can not express how much I love this piece of machinery. People know that I have two cats by seeing them, not from smelling the litter box!

I was very concerned that he would be afraid of the LR and not use it...

The 30 day return policy was a great incentive to make the purchase, in case he rejected the LR. As suggested by the manufacturer, I placed the LR next to his generic litter box for three days

I recently got the Litter-Robot about 3-4 days ago....

After researching automated litter boxes endlessly on the web. None came with higher marks--and I see that they are TOTALLY DESERVED in the case of the Litter-Robot.

I know that I am not the typical consumer, but I wanted to tell you about my experience so far....

I have 4 cats in my house, 3 are mine, and 1 is my sisters. Maybe it is because they have all become accustomed to the Litter Maid and Litter Free, but the Litter-

Robot is proving to be a huge success so far.

I ordered it and faster than I could believe...

It was delivered to my door. I unboxed it and left it sitting unplugged in my living room (along with the box it came in). Bella, my beautiful kitty was very curious, yet very cautious.

The litter itself remains so clean, since the Robot seems to clean it twice...

It revolves one way, and then revolves the other way, gathering up all the waste. I didn't want to spend that much on a machine, but let me tell you: It's worth it! I don't regret purchasing it.

No cat owner should be without the Litter-Robot.....

I have been telling everyone I know about your product, but I am only one person and don't know a whole lot of people.

We all love our Litter-Robot.....

The cats adjusted to it immediately. Now the cats wait for it to cycle and then run and use it because they know it is clean. How smart is that!

It is quiet, thorough, and completely dependable.....

I highly recommend the Litter-Robot to everyone! As an added bonus, the kittens absolutely LOVED the cardboard box and the cardboard packing material.

I've had a Litter Robot for over a year and it is wonderful.....

I did have problems getting one of my cats to use it, but both eventually did. I had to put a gooseneck light so that it shined in one of the port holes to light the interior.

I bought the Litter-Robot a couple of weeks ago....

And I can't tell you how much I love it! My cat took to the new litter box fairly easily and has been using it consistently.

I was so burned by a bad experience with the Litter Maid brand.....

That I really did not pay too much attention to the Litter Robot when I first heard of it. My husband was the one who did the research on it, and convinced me that we should try one

I just got the Litter Robot last weekend and I must say....

That this is the best automatic litter box I've ever had! I've used the Littermaid and the Petmate models and have since returned them to the local pet store.

When I received the robot, I had no intention of sending this handy little machine back.....

My cats HAD to except it. And with some careful nudging and re-enforcing all was OK, they finally accepted it.

We purchased our Litter-Robot two years ago this month.....

It was a Christmas present my husband and I gave ourselves (and our two indoor cats.) It is absolutely fantastic and our only regret is that we did not hear about it sooner. I have to rank it right up there with our dishwasher, microwave, and

automatic garage door opener

WOW! I never post product testimonials, but with the time and energy the Litter-Robot has saved me this week....

I felt compelled to send a huge endorsement and thank you. This is the greatest invention ever!

Not only did "Little One" take to the new box but it is just as good as advertised.....

It is easy to clean, no traditional mess and the cat even seems fascinated when it goes into its cleaning cycle. She sits and watches.

I have had my Litter-Robot for 72 hours. All 3 cats are using it.....

Their old boxes are still available to them but they prefer the robot! Even my 16-year-old and very frail cat is using it.

I thought the invention of clumping litter was the most I could hope for...

with my technical background, I took one look at the competing automatic litter boxes and knew they wouldn't work. When I found your website...I knew yours would.

I recently bought a litter robot for my 2 cats and I love it!!

It was easy to set up, is a breeze to clean and saves me money on litter!! I am a stay at home mom of an infant and my time is at a premium. I was throwing away about 10 lb of litter a week because I didn't have time to scoop it regularly.

I have never before been so thrilled with a product that I felt compelled to write a testimonial about it, but the litter-robot is the best invention I have ever run across in my life.

...now that I have it and have used it, It is more than worth every single penny I paid for it. I wouldn't take \$50,000 for my litter-robot if it meant I had to go back to a litter-box or litter-maid.

I was impressed with the sturdiness of it and its design.

I am spreading the word about you guys and wonderful product to anyone who gives me an ear.

My Litter-Robot arrived today. Within five minutes, my cat Bobby had already used it!

My other cat, Lily used it within an hour. No problems whatsoever. Yes, the Litter-Robot is expensive...but it's worth every penny. The way the sifter works there is no unused litter thrown out. Whatever clumps is what gets scooped. After reading other testimonials, I decided to try the cheapest scoop litter at the grocery. It worked perfectly! I know I'm going to save a lot of money on litter from now on.

First I would like to commend you on your speedy service!

This product was SO easy to set up; I had no problems whatsoever; great instructions! The Litter Robot works perfectly...

From the moment I switched it on, I have never regretted my purchase.

We have saved \$100's on cat litter, as the Litter-Robot is using 1/4 the amount of the 3 old school litter-boxes. It is easy to use, clean, and the cats are not afraid of it. Fantastically simple design that has few moving parts, so very little can go wrong. NO MORE STINKY SMELL!

This product really works! This company stands behind it's product!

Without my husband's knowledge, I spent the money for two Litter-Robots. After almost a month, my husband stated he didn't care how much I spent, and that I should order two more!

He loves them and the two we have run almost continuously with the 4 apparently healthy cats we have. Even our larger (20 pounds) cat uses the Litter-Robot and it's quite comical since his head sticks out when he does his thing.

I think the phrase "Don't know how I ever lived without one" is overused, but if any product is deserving, than this is it!

I am a doctor in my intern year, frequently working 80 hours a week. With 2 cats, I just don't have time to be scooping litter all the time, but that's what it had come to. I kept my old litter box outside on the balcony, which worked great for preventing the box odor in the home (and with a cat door let my cats have some freedom), but even with a hood, it would still get messy and attract flies, making cleaning the box the old way a disgusting chore I never looked forward to, and more and more so, just didn't have time to do as often as I would like.

There is nothing that can come close to the performance of the hard-working space age looking Litter-Robot.

There is nothing to it! My 2 cats had no problem adjusting to their new place to do their duty. Not once has the smell been a problem, there is no smell. Cleaning is easy, changing the bags, adding litter a snap. I would not be without the fantastic Litter-Robot.

While the cats were very curious, they used it without hesitation.

I am amazed that there is zero smell after three days. For someone who is used to changing a litter box every day to prevent odors, this is nothing short of a blessing.

Just wanted to send you a note regarding my litter-robot which I have now

owned for 30 days. I am very pleased and have been telling everyone I know about it!

Your product works unlike anything I have ever had.

Since receiving the Litter Robot, I have been nothing but impressed and happy. I have even told friends and family who have cats what a wonderful invention it is.

The Litter Robot and the Company are Wonderful!!

Last year we purchased a Litter Robot for two cats. It only needs to be changed once a week. The cats took to it immediately. On two occasions I called Customer Service. The staff was very friendly and immediately took care of my problem.

I have had the Litter Robot for about 3 weeks now, and it is great. I was worried that it wouldn't do what it claimed to.

My mom had had a Litter Maid for 1 day and had to send it back because it didn't work. The Litter Robot is awesome. My cat took to it immediately, and loves it.

I just have to say how great Automated Pet Care Products Customer Service Dept has been to work with (especially Theresa).

My litter-robot started giving me problems and I had to send it back for repair. In transit to Automated Pet Care Products, the base was lost by the shipping company. I was in desperate need of getting the base repaired and returned to me as soon as possible.

WOW! The Litter Robot Is literally the best. I wish the Robot had been my invention as it is a real winner.

I have had two of these units for 3 years and I just ordered 3 more. I have 9 cats and they all use the Robot.

All I can say is that I am very pleased with your product.

I had three Litter Maids in less than a year, and I always thought that the rake was gooping up on them because one of my males is very large and he urinates a lot. After I realized that it wasn't just my kids who were having problems with their toilet, and after the last one burnt up, I went searching for something better. I feel that I have found it with the Litter Robot...

"Where has this been all of my life?"

I just received my first Litter Robot 5 days ago. My 2 cats used it right away and then when it cycled and I saw how easy it was and well it worked, I said aloud "Where has this been all of my life?"

My cat had no trouble understanding what to do.

Just wanted to let you know that I received your product about a week or so ago. I set it up, plugged it in and just simply put it in place of the old litter box. My cat had no trouble understanding what to do. Within a few minutes she had used the litter robot. She immediately came back to where I was sitting with a few comments which seemed very positive - really!

A bargain at any price!

If your cats were human beings, buying the Litter-Robot is like throwing them the keys to a Ferrari!

The only thing more excellent than this product, is the amazing support and customer service. A bargain at any price!

Wow...

Let me just say "Wow". My cats think this is the greatest thing created since God made mother's milk. They are simply enthralled with your machine.

I have told everyone who will listen about this great machine where there is no scooping, no smell, no bending over, no rakes etc. etc. etc. I owned four LitterMaids at one time. I gave them all away with apologies that they were not

Litter-Robot units. Your machine makes those obsolete !!!!
